

## U.S. ARMY RESERVE HISTORY

In the 1950s, under the patronage of Presidents Harry S. Truman and Dwight D. Eisenhower, the Organized Reserve Corps was reformed into the present U.S. Army Reserve (USAR) structure and revitalized in order to play a more prominent role in supporting the Active Army in the "first line defenses." In the decades that followed, the USAR force structure evolved away from a combat role to combat support and combat service support roles. The Army Reserve participated in the Korean Conflict (1950), Vietnam Conflict (1968), Operation Just Cause (1989), Operation Desert Shield/Storm (1990-91), and Operation Joint Endeavor/Joint Guard (1995-present).

### Our Program Offers Job Opportunities Around the World

The Military Technician program offers exciting career opportunities around the world, throughout the United States, Europe, the Pacific Islands, and Korea. Choose where you want to work, another state, a different country or close to home.

# USAR Military Technician Program

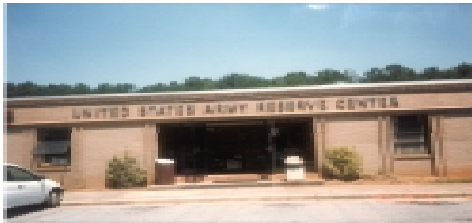

A World of Opportunities

## What is a Military Technician?

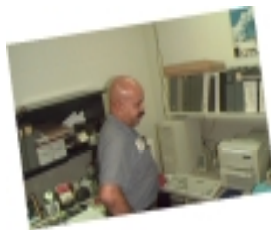

A Military Technician is a Department of the Army civilian who works 40 hours a week and also is a member of the U.S. Army Reserve (USAR). A Military Technician has an important dual role that is tailored to meet the day to day activities necessary to maintain the mobilization readiness of a USAR unit.

A Military Technician job requires USAR membership and compatibility between civilian and military jobs. A Military Technician is required to maintain active Selected Reserve membership while in the Military Technician program.

Our program employs more than 6,000 Military Technicians in approximately 200 different occupations. They are employed in occupations such as aircraft operations, personnel, supply, financial management, logistics, training, and marine and mobile equipment maintenance.

## Dual Status

## Military Technicians

## Dual Pay for Dual Jobs

Our technicians are highly trained, versatile personnel. Their occupational grades vary from Unit Administrative Technician, GS-5 up to Command Executive Officer, GS-14.

### Civilian Pay Scale
